Hi, I'm David.

Production Engineer with an obsession for **AI and building things**. My goal: moving operations toward **AI and smart systems**.

[View My Work](#)

[Let's Connect ↗](#)

My Mission

Artificial intelligence is changing how humanity creates value. Yet while much of the conversation focuses on software, some of the most important opportunities lie in the **physical world** — factories, supply chains, production systems, and operations.

My mission is to help build the bridge between operations and AI.

Building meaningful AI for industrial domains requires more than technical expertise — it requires process understanding, operational thinking, and respect for how real-world systems work.

GOALS FOR 2026

🚩 **Ship 3 AI products**

✧ **Open to collaborations**

Experience

Education

M.Eng. Technology Management

📅 RWU Ravensburg-Weingarten 📅 Oct 2024 – Feb 2026

Specialization: Business Optimization

B.Eng. Mechanical Engineering

📅 DHBW Friedrichshafen 📅 Oct 2021 – Sep 2024

Production & Management · Team Lead, Zukunftsfabrik Bodensee

Work

Production Engineer

📅 ZF Friedrichshafen AG 📅 Mar 2026 – Present

Driving shop-floor digitalization and identifying where AI delivers measurable gains.

Master's Candidate — Ops Strategy

📅 ZF Friedrichshafen AG 📅 Sep 2025 – Feb 2026

Thesis: performance analysis frameworks across ZF's global production network.

Working Student — Project Management

📅 EBZ SysTec 📅 Oct 2024 – Feb 2025

Logistics planning for a Mercedes-Benz plant integration.

Skills

A symbiosis of two worlds — operational depth and AI fluency.

AI & SOFTWARE

Claude API

Prompt Engineering

n8n

Python

RAG

Agentic Workflows

LLM Ops

OPERATIONS

Lean Manufacturing

Production Planning

SOP Design

Process Optimization

Launch Management

Logistics

Featured Projects

• Automation • n8n

• In Build

Ops Workflow Automator

Describe an ops handoff — get an AI-generated automation plan plus an importable n8n workflow JSON.

[View details ↗](#)

• AI • Operations

• In Build

SOP Generator

Describe any process — get a fully structured SOP with steps, owners, risks, and KPIs.
